ABOUT US

The Hospices Civils de Lyon (HCL) biobank is a large-scale research support platform set up to improve clinical research and public health. Attached to the Health Research Department (DRS), it is made up of 5 specialized biorepositories, located on each hospital sites.

OUR MISSIONS

Set up collections of human biological samples

- Collecting and processing samples
- Secured storage of samples
- Associated clinical data management
- Collaboration for sample management in clinical trials

Transfer of biological samples for institutional or industrial research projects, in France or abroad.

- Compliance with French regulations and ethical requirements
- Biobank quality standard certification ISO 20387

OUR PROCESS

Contact and request:

- Set up of human biological samples
- Transfer of high quality human biological materials

Feasibility:

- Technical approval
- Collection manager approval

Analysis and validation:

- Scientific
- Financial

Implementation:

- Contract
- Storage
- Biological material transfer

OUR THEMATICS

Autoimmune diseases	Heart diseases	Digestive diseases
Fœtal pathology	Infectious diseases/ COVID19	Hereditary metabolic diseases
Extracellular matrix diseases	Neurology disorders	Neuromuscular diseases
Childhood diseases	Pulmonary diseases	Oncological pathologies
Non-pathological tissues	Healthy controls	Urology

Online catalog:
