

Etudes en cours

- VISCOTAC : Tests viscoélastiques versus tests de biologie conventionnelle pour la gestion de la coagulopathie des traumatisés sévères : essai randomisé en ouvert, de supériorité, contrôlé en deux groupes parallèles. Ce projet a été gratifié d'un financement national (PHRC).
- NEPHROTRAUMA : dosages de NEPHROCHECK® chez tous les patients polytraumatisés sévères pour décrire la cinétique du biomarqueur dans cette population qui connaît beaucoup d'épisodes d'IRA.
